- ✗ Paint cans
- ✗ Text books

Recycling Guidelines

- Please rinse all bottles and jars and remove the lids. There is no need to remove labels since they disintegrate during the recycling process.
- You may flatten all cans and plastic bottles to conserve space. Cardboard must be broken down to 3'x3' sections and flattened.
- Place all recyclables together in your bin. All recyclables are mechanically and manually sorted at the processing facility thanks to Rumpke Recycling's single stream processing method.
- Set your recycling bin out the night before your regular trash collection day.
- Extra materials can be placed in a brown grocery bag or similar size plastic container. Please clearly label it "recycling" and set it on top of or next to your Rumpke Recycling bin. No trash cans may be used for recycling.
- Rumpke Recycling strives to accept as many items as possible, but we cannot collect certain items because of contamination issues or lack of market availability.
- For electronics or household hazardous material, please contact your county's solid waste district.
- Please place paper or fiber materials under your bin in the event of rain.
